Global Paper Vision – Priorities

We call upon the global paper industry, consumers, retailers, governments, investors and non- governmental organizations to commit to urgent actions encompassing the following priorities, addressing the entirety of the paper life-cycle:

- reduce global consumption and promote fair access to paper
- maximize recycled fiber content
- ensure social responsibility
- source virgin fiber responsibly
- reduce greenhouse gas emissions
- ensure clean production
- ensure transparency and integrity

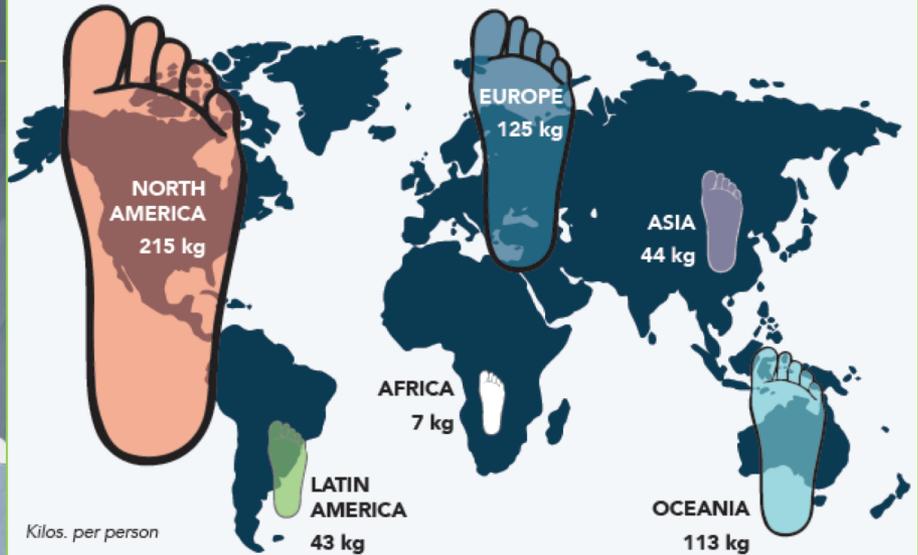

THE STATE OF THE GLOBAL PAPER INDUSTRY

environmentalpaper.org/stateoftheindustry2018

With a commitment to ethical paper purchasing large institutions can:

- **implement their values and achieve internal goals.**
- **join a global conservation movement moving an entire industry toward marketplace solutions.**

EPN resources can help.

The Paper Steps

To Environmentally Responsible Paper

In the Steps below, 'Environmental Fiber Attributes' are defined as:

- Post-consumer Recycled Fiber
 - Pre-consumer (or deinked) Recycled Fiber
 - Agricultural Residue Fiber¹
 - Forest Stewardship Council certified and free of Endangered and High Conservation Value Forest fiber²
- Cleaner Bleaching Production Technologies are also included in each Step.

ENVIRONMENTALLY INFERIOR PAPER

This paper has no, or very minor, environmental attributes

MEETS NO MINIMUM CRITERIA:

- Has no or minimal recycled content
- Virgin tree fibers not FSC-certified and may be from intact, endangered and or high conservation value forests

TRANSITIONAL PAPER

At least 10% of the fiber has environmental attributes and meets the minimum criteria below

MINIMUM CRITERIA:

- 10% post consumer OR FSC Mixed Sources certified³ OR 10% agricultural residue¹ content
- Virgin tree fibers can not be from controversial sources⁵
- Bleaching: Can not be Elemental Chlorine (EC) pulp bleaching process

ENVIRONMENTALLY IMPROVED PAPER

At least 50% of fiber has environmental attributes and meets the minimum criteria below

MINIMUM CRITERIA:

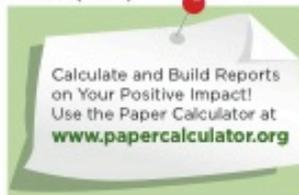

- Minimum 30% post consumer recycled if the paper contains virgin tree fiber
- FSC certification required on papers with more than 50% virgin tree content
- Virgin tree fibers can not be from controversial sources⁵
- Bleaching: Must be EECF⁶, TCF, PCF pulping and bleaching processes only; excludes Elemental Chlorine Free (ECF) bleaching

ENVIRONMENTALLY SUPERIOR PAPER

All fiber (100%) has environmental attributes and meets the minimum criteria below

MINIMUM CRITERIA:

- Minimum 50% post consumer recycled content if the paper contains virgin tree fiber
- Virgin tree fiber can not have controlled wood content⁴ or controversial sources⁵
- Bleaching: Must be processed Chlorine Free (PCF) or Totally Chlorine Free (TCF)

What's in Your Paper?

presented by environmental paper network

To find a list of Environmentally Improved and Environmentally Superior Papers visit www.WhatsInYourPaper.com.

ECOPAPER DATABASE

<http://epd.canopyplanet.org>

Brand Name	Manufacturer	Paper Type	Coated/Uncoated	Ancient Forest Friendly	Paper Step	Post-Consumer Recycled Content	Agricultural Residues/Alternative Fibers	Bleach Method	Recognized Certifications

Forestry Certification

FSC

SFI

	FSC	SFI
Overall	Prescriptive & performance-based	Flexible & systems-based
Max. clearcut size	In the U.S., varies by region from 10 to 80 acres	120 acres <u>average</u> across N. America
Pesticide use	Prohibits use of atrazine and other persistent, bioaccumulative, and toxic chemicals	Shorter list of the most hazardous chemicals prohibited, “except where no other viable alternative is available”
Old-growth forests	Explicitly recognizes the rarity of old-growth forests in the U.S. and prohibits harvesting or road construction in them	Requires “support of and participation in plans or programs for the conservation of old-growth forests in the region of ownership or forest tenure”
Indigenous peoples’ rights	Requires outreach to tribal representatives + protection of indigenous peoples’ rights, both legal and traditional, on public + private lands	No requirements on private lands On public lands, requirement to confer with affected indigenous peoples

CALCULATE YOUR IMPACT

Calculate the ENVIRONMENTAL IMPACTS of your paper.

COMPARE THE IMPACTS of different papers and varying amounts of recycled content.

Identify ways to REDUCE YOUR IMPACTS and your paper expenses.

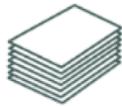

GET STARTED!

STEP 1: CHOOSE YOUR CALCULATION TOOL

CALCULATE IMPACTS OF 1 TYPE OF PAPER OR GROUPS OF PAPER

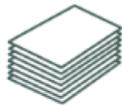

INDIVIDUAL CALCULATIONS

Calculate the impacts of a specific paper you're already using or wish to use:

Wood Use
Net Energy
Greenhouse Gases
Water Usage
Solid Waste
Etc...

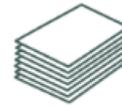

Or compare the impacts of one specific paper to alternatives with higher recycled content

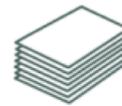

Start an Individual Calculation

GROUP CALCULATIONS

Calculate or compare the combined impacts of several different papers you use today to one or more sets of recycled alternatives you wish to use.

Combined Total:
Wood Use
Net Energy
Greenhouse Gases
Water Usage
Solid Waste
Etc...

Start a Group Calculation

STEP 2: DEFINE YOUR BASELINE PAPER

THE BASELINE PAPER IS USUALLY THE PAPER YOU ARE USING TODAY.

1. Name Your Paper: (For example: Acme XYZ, Baseline Paper or Current Paper)

2. Select a Paper Grade:

[\(Click here for a list of common paper products and their corresponding paper/grades\)](#)

3. Enter Quantity and Select Unit of Measurement:

[\(Click here for help calculating the weight of copy paper from the number of reams and/or sheets of paper\)](#)

4. Enter the Percentage (%) of Recycled Content:

[\(What is this?\)](#)

OR

[HOME](#)[ABOUT](#)[FAQ](#)[GLOSSARY OF TERMS](#)[RESOURCES](#)[POWER USERS](#)[TESTIMONIALS](#)[CONTACT US](#)

STEP 2: DEFINE YOUR BASELINE PAPER

THE BASELINE PAPER IS USUALLY THE PAPER YOU ARE USING TODAY.

- Name Your Paper: (For example: Acme XYZ, Baseline Paper or Current Paper)
- Select a Paper Grade:
 - Uncoated Freesheet (copy paper)
 - Coated Freesheet (high-end catalog)
 - Uncoated Groundwood (newsprint)
 - Coated Groundwood (catalog, magazine)
 - Supercalendered (newspaper inserts)
 - Paperboard: Solid Bleached Sulfate
 - Paperboard: Coated Unbleached Kraft
 - Paperboard: Coated Recycled Board
 - Paperboard: Uncoated Bleached Kraft
 - Paperboard: Uncoated Unbleached Kraft
 - Paperboard: Uncoated Recycled
 - Linerboard
 - Corrugated Container
 - Tissue

FOREST DISTURBANCE	37.2 acres	0 acres 37.2 acres less

Explanation of Data Values

Wood Use

Wood use measures the amount of wood required to produce a given amount of paper. Results are reported in fresh/green tons of wood. The methodology does not include the forest residues left behind during pulpwood harvest in the forests (i.e., slash, roots). If forest residues were included it could be twice the number, as roughly 50% of biomass is left after harvest.

- Old Paper Use uses 399 tons of wood, [made from about 2,390 trees](#)
- New Paper Choice uses 0 tons of wood, [made from about 0 trees](#)

Total Energy

Total energy measures all energy required over the paper's life cycle, including all renewable and nonrenewable resource use, including black liquor and all wood sources.

- Old Paper Use uses 2,550 million BTUs, [equivalent to 3,030 residential refrigerators operated/year](#)
- New Paper Choice uses 1,540 million BTUs, [equivalent to 1,840 residential refrigerators operated/year](#)

GHG

Greenhouse gases/climate change impacts measures carbon dioxide or CO₂ from burning fossil fuels and methane from paper decomposing in landfills and short-lived climate pollutants (includes black carbon and organic carbon) which contribute to climate change by trapping energy from the sun in the earth's atmosphere. This impact category also includes forest carbon storage loss from logged forests.

- Old Paper Use produces 1,800,000 pounds of carbon dioxide, [equivalent to 163 cars/year](#)
- New Paper Choice produces 761,000 pounds of carbon dioxide, [equivalent to 69.1 cars/year](#)

Water Usage

Water consumption measures the amount of process and cooling water that is consumed or degraded throughout the life cycle of the paper product.

- Old Paper Use uses 2,140,000 gallons, [equivalent to 1,540 clothes washers operated/year](#)
- New Paper Choice uses 1,950,000 gallons, [equivalent to 1,400 clothes washers operated/year](#)

Solid Waste

Solid waste measures sludge and other wastes generated during pulp and paper manufacturing, and used paper disposed of in landfills and incinerators.

- Old Paper Use produces 118,000 pounds of solid waste, [equivalent to 29,400 people generating solid waste/day](#)
- New Paper Choice produces 110,000 pounds of solid waste, [equivalent to 27,400 people generating solid waste/day](#)

Nitrogen oxides/ground level ozone (NO_x, which includes NO and NO₂) measures products of the combustion of fuels that contain nitrogen. NO_x can react with volatile organic compounds and sunlight in the lower atmosphere to form ozone, a key component of urban smog. NO_x forms ozone and can also, in parallel, lead to acid rain.

- Old Paper Use produces 98,000 persons x hrs. x pounds O₃ equiv/m³, [equivalent to 124 gasoline powered passenger cars/year](#)
- New Paper Choice produces 89,200 persons x hrs. x pounds O₃ equiv/m³, [equivalent to 113 gasoline powered passenger cars/year](#)

Purchased energy is a subset of total energy, and measures how much energy comes from purchased electricity and other fuels.

- Old Paper Use consumes 1,450 million BTUs, [equivalent to 1,730 residential refrigerators operated/year](#)
- New Paper Choice consumes 1,540 million BTUs, [equivalent to 1,840 residential refrigerators operated/year](#)

New in the Paper Calculator 4.0

- Tissue products included
- Expanded impact categories, including forest impacts
- Better user interface, including tool for determining paper volume based on number of sheets/reams of paper.
- Updated methodology and new data sources previously unavailable

Have our collective efforts made a difference?

- Hundreds of stakeholders engaged in green innovation and sustainable supply chains
- Progress on achieving zero deforestation for pulp and paper products
- Many responsibly made and certified products available
- Strong paper recovery rates, less toxics, innovative uses of “waste” byproducts and increasing energy efficiency per unit

Thank you.

Successful Sustainable Paper Procurement Strategies

Alicia Culver
Executive Director
RPN

May 9, 2018

Sustainable Paper Procurement Strategies

- **Adopt sustainable procurement policy**
- **Establish paper reduction procedures (e.g., paperless communications, duplex printing, etc.)**
- **Establish standards for environmentally preferable paper, printing services, and imaging equipment**
- **Specify/purchase imaging equipment that reliably scans, emails, and prints double-sided using 100% recycled-content paper**
- **Negotiate discounts for environmentally preferable paper**
- **Track and report cost savings and environmental benefits**

Types of Sustainable Paper Policies

Attributes and Certifications

Use a ton of Rolland Enviro Copy rather than a virgin paper and save the equivalent of:

- **17** trees
- **16,399** gallons of water
- **5,512** lb of greenhouse gas emissions
- **1,678** lb of solid waste

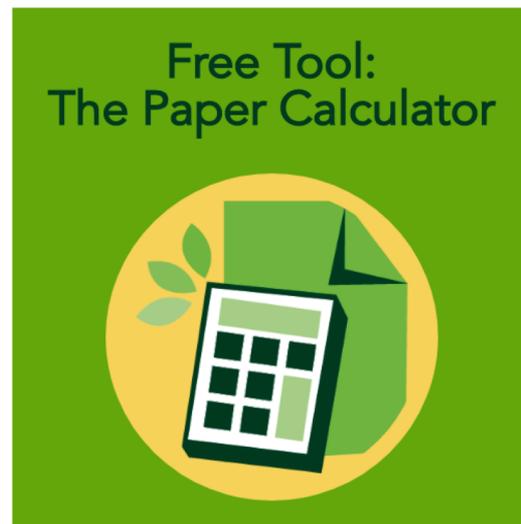

Strategies to Secure Better Pricing for Sustainable Paper

- Negotiate a **SEPARATE CONTRACT** for sustainable paper
- Check pricing on **COOPERATIVE** purchasing agreements
- Utilize state and local government contracts
- Add sustainable paper to your **CORE/market basket list**
- **REMOVE** virgin paper from your core/market basket list
- **BLOCK** unsustainable paper products from your contract
- Ask **EXISTING** vendors for better pricing on sustainable paper

Paper Tracking Options

- **\$ Spent on Paper Products Over Time**
- **% of Compliant Products Purchased**
(Compared to Goal or Over Time)
- **Cost Impacts**
- **Environmental Benefits**
(using EPN Paper Calculator)

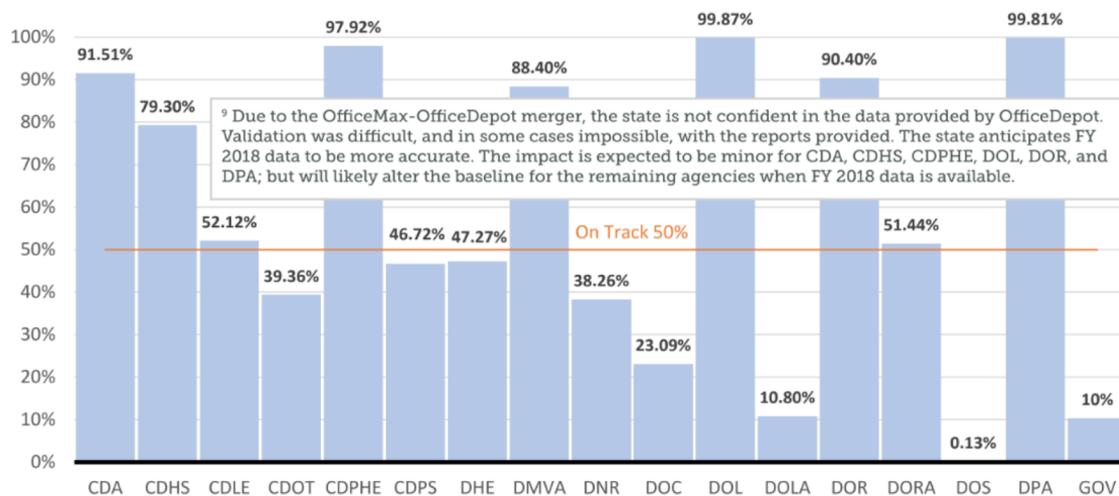

ENVIRONMENTALLY PREFERABLE PURCHASING (EPP) GOAL

COLORADO
Greening Government
Leadership Council

Agency Progress Toward Goal⁹

50% of state purchased white office paper recycled by FY 2017; 90% by FY 2020

Environmentally Preferable Purchasing (EPP)

The state is at 73.25% for recycled white paper, meeting the annual goal.

The state is behind in developing the additional EPP baselines, goals and directives as directed by the executive order.

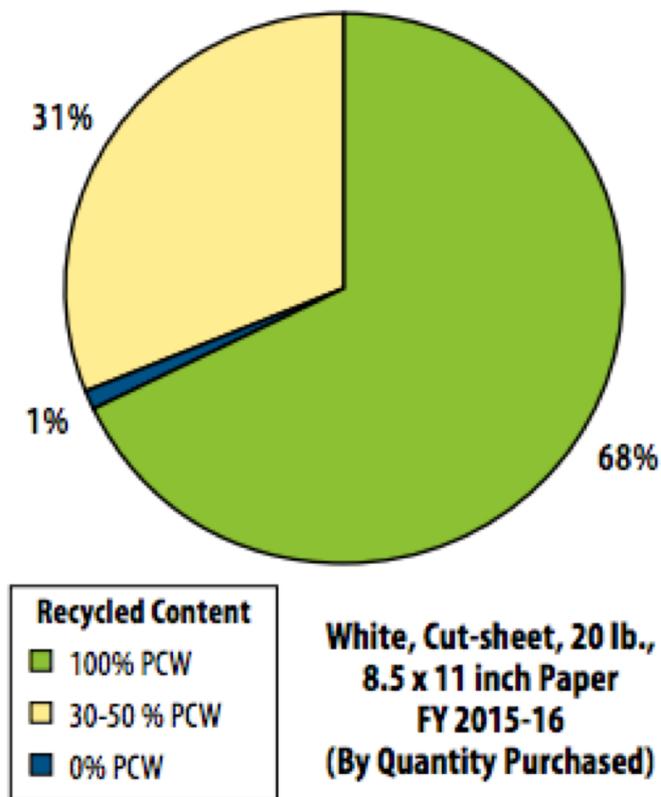

Paper Purchasing: Portland, OR

- **Goal**

At least 30% post-consumer recycled content (PCRC) for all paper purchases

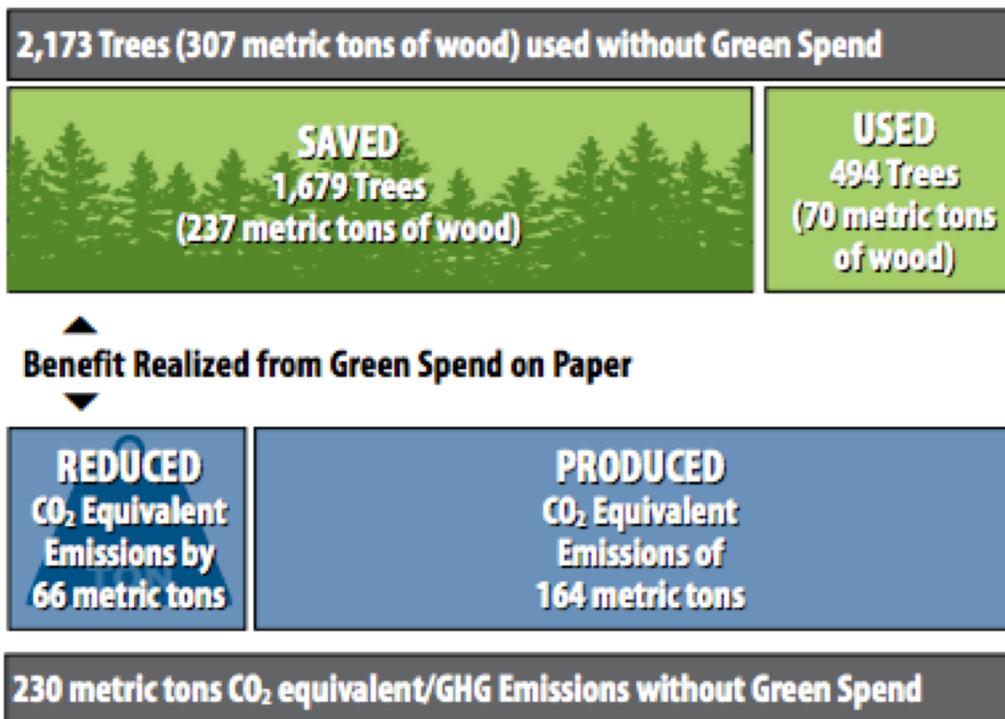

- **Results**

For FY 2015-16, 99% of paper purchases had 30% or higher PCRC

Environmental Benefits: City of Portland, OR

Environmental Benefits Realized from Office Paper Green Spend, FY 2015-16

Environmental impact estimates were made using the Environmental Paper Network Paper Calculator Version 3.2. For more information visit www.papercalculator.org.

King County Sustainable Purchasing Strategies for Copy Paper

Copy Paper

King County has purchased recycled content copy paper since implementing its original buy recycled policy in 1989. King County established an updated policy in 2012 to buy 100 percent recycled content copy paper and to reduce copy paper consumption by 20 percent. In late 2016, a new contract was executed that only makes available 100 percent recycled content copy paper. The reduction in the purchase of copy paper paired with the new pricing saves the County money.

Goals

King County's Strategic Climate Action Plan

- Buy 100 percent recycled-content copy paper
 - 2017 status – 97% compliance
 - Reduce copy paper purchases by 35 percent by 2020
- 2017 status – 25% reduction
 - 2017 - \$26,000 cost savings

Choose	Avoid	End of Life
<ul style="list-style-type: none"> • high recycled content • FSC-certified paper • chlorine free • send documents electronically instead of printing 	<ul style="list-style-type: none"> • virgin paper • low recycled content • single-sided printing • printing extra copies and meeting agendas 	<ul style="list-style-type: none"> • recycle

Palo Alto's Green Purchasing Program

First green purchasing effort was paper policy was in 1991 before there was a green purchasing program.

Overview

- Paper policy was revised in 2003 and in 2018
- Green Purchasing Program is led by Public Works–Watershed Protection
- Driven initially by pollution prevention goals, e.g.,: paper (dioxin concerns), less-toxic pest management, and custodial products, zero waste;
- Green Purchasing Policy adopted 2008

Why we care

- Pollution and Waste Prevention
- City Policies that intersect with paper use and procurement
 - Paper policy in 1990s, 2003
 - Mercury and Dioxin Reduction Policy, 2001
 - Support for Sustainability, 2007
 - Green Purchasing Policy, 2008
 - Zero Waste by 2021 Directive
 - Climate Action Plan--Default to Green” aspirational goal
- Paper is a visible sustainability signal to the organization
- Paper Reduction=Cost Savings

Who else buys 100% recycled-content papers?

- San Jose
- Santa Clara County
- City of San Francisco
- Alameda County
- City of Portland OR)
- King County, WA
- Minnesota Pollution Control Agency
- US EPA Region 3 (Philadelphia, PA)
- US EPA Region 9 (San Francisco, CA)

Highlights of Paper Policy

Full policy at cityofpaloalto.org/sustainability

- 25% paper reduction target from 2016 levels (5% year)
- Standards for recycled content office and custodial papers:
 - Copy paper, letterhead, utility bill inserts are 100% recycled content, PCF
 - 30% for note pads, notebooks, manila file folders, calendars, mailing labels, sheet dividers, sticky notes and easel pads;
- Vendors must comply with policy and report on paper use upon request;
- Imaging equipment must be compatible with and only use 100% recycled content paper
- Provides guidance on getting best price for paper products
- City does not have to exclude competition or purchase products or services that do not perform adequately or are not available at a reasonable price in a reasonable period of time (Zero Waste Program can waive the requirement);

Policy Implementation Status

Goal	Current	What's Next
<p>Maximize recycled content for office papers</p>	<ul style="list-style-type: none"> • Copy paper • City letter head • Utility bill inserts • Most vendor printing • Standards for custodial papers <p>100% PCRC, PCF in most cases</p>	<ul style="list-style-type: none"> • Look at smaller-use office papers for minimum 30% (manila folders, note pads, labels) • Encourage FSC products
<p>Paper Reduction (5% per year target)</p>	<ul style="list-style-type: none"> • Managed Print Services contract • Paperless Campaign • Junk Mail Reduction • Some electronic billing, filing, forms and contracts • Zero Waste Outreach • Vendor Reporting 	<ul style="list-style-type: none"> • Deploy Abacus software on copiers in 2018 (prompts users to reduce paper, tracks paper use); • Paper Reduction Plan/ expand paperless culture: electronic billing, filing, forms, contracts, document review

Less Paper=Money Saved

Palo Alto's 25% reduction target (copy paper only)=\$95K annual savings

- Total spend: \$379,827
- Average monthly spend: \$34,530
- Cost per sheet b/w: 9 cents (22 cents for color)

Assumes just copy paper via ARC managed print service contract from February-December 2017. Does not include paper use from external printing vendors or desk top printers.

Environmental Benefits Of 100% Recycled Copy Paper

**237 fewer trees, energy savings equivalent to 5 homes/year,
reduced CO2 equivalent to six cars/year.**

*Paper used February-November 2017 (28,195 lbs.) compared with 30% recycled content paper used in previous years.
Including vendor paper used during this time increases beneficial impacts by approximately 30%.*

Environmental Paper Network

Clear Values, Start Again

■ Baseline Paper

■ Target 1 Paper

Paper	Uncoated Freesheet (e.g. copy paper)	Uncoated Freesheet (e.g. copy paper)
Quantity	28195 Pounds	28195 Pounds
% Recycled	30	100

Wood Use

37 tons

Net Energy

413 million BTU's

307 million BTU's

Greenhouse Gases

70,215 pounds CO₂ equiv.

49,803 pounds CO₂ equiv.

Water Consumption

274,731 gallons

164,023 gallons

Solid Waste

23,917 pounds

16,506 pounds

Lessons Learned

1. Quality paper counts. Bad paper= Policy Death.
Palo Alto currently uses:
 - New Leaf Pioneer, 100% PCRC, 20#, PCF, FSC (printing vendor)
 - Husky Copy 100% PCRC, 20#, PCF, SFI (copy paper via ARC managed print services contract)
2. Imaging equipment suppliers can be ill-informed about the quality of recycled paper. Read: [*The Environmental Paper Listening Study by Conservatree/Susan Kinsella*](#)
3. Let the largest/most scrutinizing paper users test any new papers for approval
4. Policy compliance is an ongoing process, not a project. Prioritize what you need to fix, you probably can't make your system perfectly water tight

Lessons Learned

5. Place requirements in all key contracts:
 - Managed Print Services contracts (copiers)
 - External printing services
 - Office supply and custodial contracts
 - Require reporting upon request
 - Place preferred paper in “Market Basket”

6. Build policy into the organization:
 - Educate people about how/why of policy
 - Place in Purchasing Manual
 - Use “blocking functions” to avoid incorrect paper purchase, e.g., web-based orders, P-cards, petty cash reimbursement
 - Have multiple department heads sign the policy to prevent unilateral decisions about your paper policy;
 - Use tech to track paper use and impacts (e.g., Abacus/similar).

Lessons Learned

7. Peer review your policy. Palo Alto's policy was peer reviewed by: Alicia Culver: Responsible Purchasing Network, and Susan Kinsella, Conservatree Paper (nonprofit);
8. Offer help to coworkers to locate appropriate substitute papers, waive requirements when the right paper cannot be found;
9. Stay in touch with organizations like RPN and EPN.

Challenges/Next Steps

1. Reduce paper use

Potential solutions:

- Draft Paper Reduction Plan (roles for different departments)
- Expand and monitor current paperless efforts (automatic duplexing, DocuSign, electronic filing and business processes)
- Deploy [Abacus software](#) to track individual paper use and savings

2. Institutionalize policy awareness/conformance

Potential solutions:

- Expand use of EPN Paper Calculator for all paper types.
- New enterprise resource planning software may flag priority items to green and prompt users on policy guidance;
- Attend Purchasing staff meetings.
- Staff outreach during Pollution Prevention Week and Earth Day
- Ensure budgeting team is aware of policy.

Buy Less & Buy Better: Alameda County's Strategic Paper Initiative

Karen Cook, Sustainability Project Manager
May 9, 2018

Alameda County

SUSTAINABILITY

Local Action, Global Impact.

Goal: Buy Less

Strategy: Set 20% ↓ target in climate action plan

Employee

Behavior change through campaigns

Agency

Process changes to adopted digital business

Countywide

Contract changes to require duplexing

Goal: Buy Better

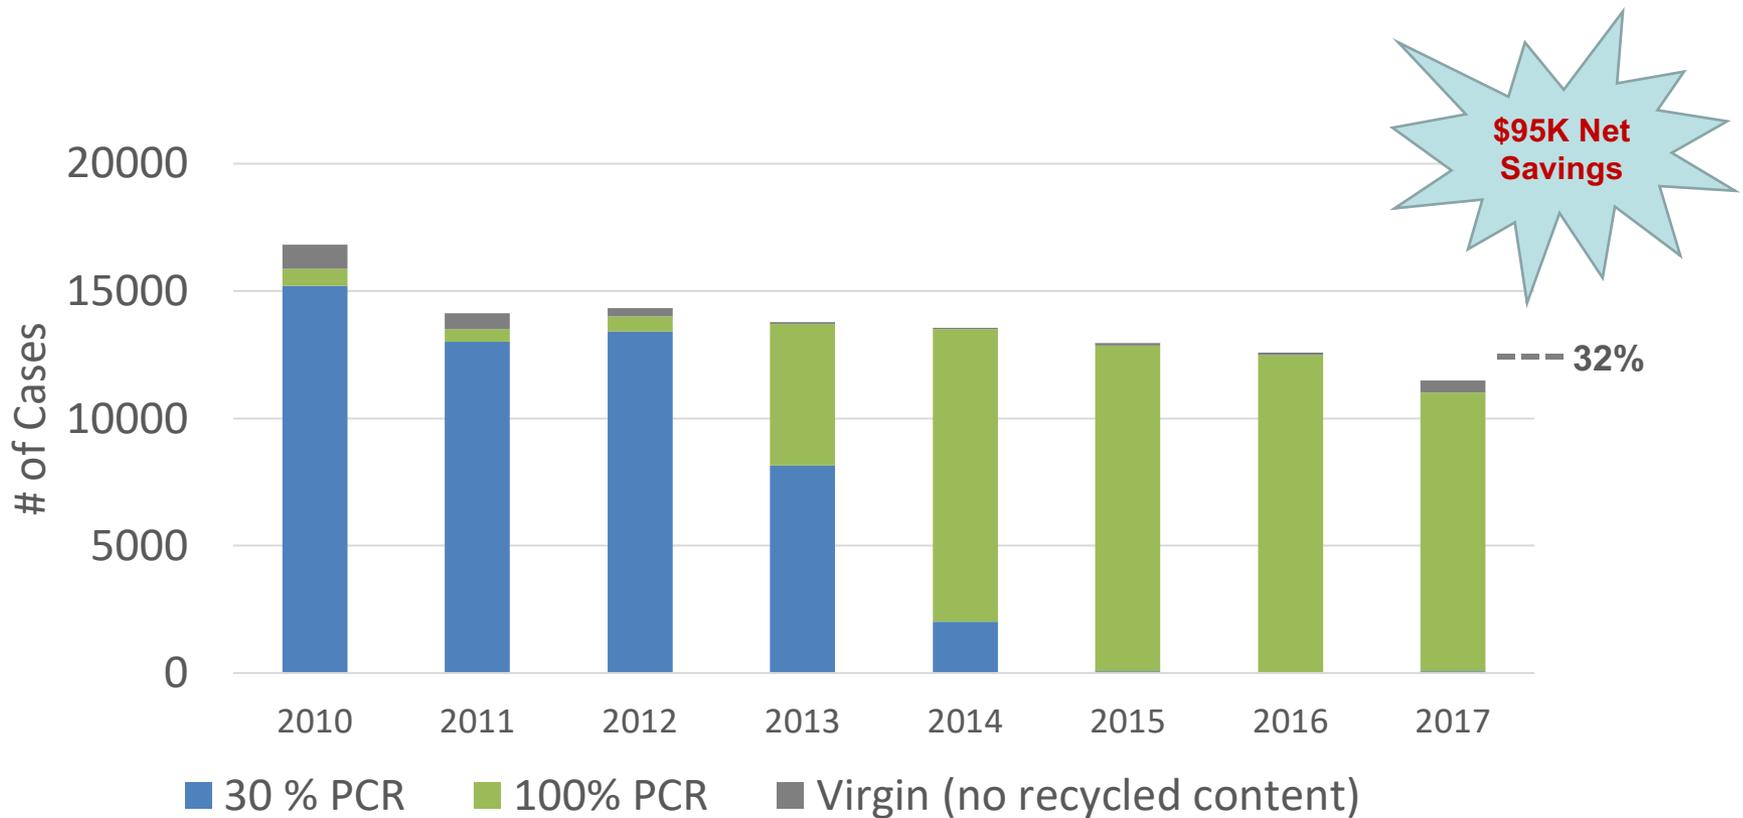

Strategy: Procure 100% PCR exclusively

1. Pilot test paper with key stakeholders
2. Bid only for 100% PCR for regular white copy paper

**Savings of
\$3.80/case**

Paper Reduction Progress

We're Making a Difference

Avoiding carbon pollution equivalent to removing 94 cars from the road for one year.

Using fewer trees equivalent to 102 football fields of forest.

Environmental impact estimates were made using the Environmental Paper Network Paper Calculator Version 3.2.1. For more information visit www.papercalculator.org. Based on 2010-2017 paper use reduction, accounting for transition to 100% PCR.

Actual reductions over baseline are: 473 mtCO₂e and 6639 fewer trees

Piggybacking

Piggybacking on Alameda County's green contracts provides you access to our volume pricing and gives you the benefits of our green product research and promotional strategies. You may also save time and resources by using our competitive bidding process to fulfill your contracting needs. Though vendors are not required to allow piggybacking, we've asked each of these vendors to consider offering the same green products and implementation strategies they provide the County to other organizations who piggyback.† See these [tips](#) for more information about piggybacking.

Click on the product categories below to find out more about the green features of these County contracts. To learn more about any of these contracts or to request relevant documents or contract pricing, contact the Alameda County General Services Agency's Procurement Department/Contracts Team at (510) 208-9600.

Piggybacking on Alameda County's green contracts is a great way to leverage our research on environmentally preferable products.
